"Those who dream by day are cognizant of many things which escape those who dream only by night."

EXPERIENCE

L2 Support Engineer for Big Data Operations

Webhelp Romania

Sep 2021 – Mai 2022 Remote

- Managing issues trough Jira ticketing system
- Process raw datasets trough python scripts written by me and transform them in CSV / XSL.
- Bash scripting

Linux System Administrator

News Factory Hong Kong

Oct 2020 – Aug 2021 Bucharest

- Participating in techincal skype calls with business clients to design future structure of client's website.
- Setting up LAMP stacks in new VMs, hosted on different providers, preparing nodejs + chromium, selenium driver or whatever the client needs installed in his server to be able to start working on it
- Maintaining exSysAdmin's php scripts.

Linux System Administrator

Third Wave Network Cluj-Napoca

Oct 2018 – Sep 2019 Târgu Mureș

- Compiling Linux kernerls to patch NIC drivers.
- Compiling LAMP, LEMP, FAMP, FEMP stacks from source.
- I managed 200 sites on OVH servers in France, Asia, Canada, US, and others hosted by Host1Plus (Chicago, LA), Liquid-Web, LeaseWeb, MojoHost, Amerinoc, Amazon Web Services. Most remote servers were using CentOS 7/6. I mounted the Dell PowerEdge R730xd local servers on the Rack myself. I put them in RAID60, then I installed FreeBSD13, Windows Server 2019, Ubuntu and CentOS7. I was making an identical copy of each live site via rsync and transferred it to the local server with CentOS so that it could be easily be modified later by the other colleagues through the GitLab installed by me. I also installed Nagios to constantly monitor the uptime of all sites. I established real-time replications between the MySQL databases of remote and local servers. Most of the time I worked with Nginx, Apache for websites and Dovecot for mail servers.

ONLINE CV

andu74dev.github.io

STRENGTHS

Docker | KVM | Kubernetes | Load balancing

Red Hat | CentOS | FreeBSD | Arch Linux | macOS Server | Slackware | Debian | Ubuntu

Nginx | Apache | Nagios | Node & Npm

LANGUAGES

- Proactive attitude
- Devotion, passion and high reliability in critical situation

PROJECTS

Laganas2 International

Game Server&Client + Website

2014 - 2019 Founder

- PHP Website Frontend & Backend written by me from scratch and translated from English to Romanian, German, Spanish and French.
- 800k uniques visitors — website monthly traffic
- Game client for Windows written in Python, not written by me from scratch, but i've made a lot of huge improvements in code by creating new in-game systems for better UX. I've also translated the entire game UI from English to Romanian, German, Spanish and French.
- Game daemon for FreeBSD written in C++, not written by me from scratch, but when you write a new UI module for the client, you also have to write a C++ server-side code for the Python client.
- 1k players active simultaneously in rush hours = 10k players connecting within 24 hours — game monthly traffic
